DREXEL UNIVERSITY VOLUNTARY TAX DEFERRED ANNUITY PLAN

Investment Options Comparative Chart

Your plan allows you to direct how your contributions are invested. When making investment decisions, you should keep in mind how long you have until retirement, your tolerance for risk, how this retirement plan fits into your overall financial picture, and the impact of fees. The information on the following pages will help you compare investments that align with your retirement goals.

Part I consists of performance and fee information for plan investment options. This part shows you how well the investments have performed in the past as well as any fees and expenses you will pay if you invest in an option.

Part II contains information about the annuity options available within your employer's retirement plan.

For more information on the impact of fees and expenses to your plan, refer to the Summary of Plan Services and Costs or visit the DOL's website at **http://www.dol.gov/ebsa/publications/401k_employee.html**. Fees are only one of many factors to consider when making an investment decision.

Financial Services

Part I. Performance and Fee Information

The following chart lists your plan's investment options that can vary based on market fluctuations. Benchmark information for fixed-return investments is not provided in this chart. When evaluating performance of variable investment returns, you should consider comparing the returns of each investment to an appropriate benchmark, which is provided below. A benchmark is a generally accepted unmanaged group of securities whose performance is used as a standard point of reference to measure and compare investment gains or losses for variable return investments. Keep in mind that you may not invest in the benchmark indices which are shown for comparative purposes only. For investments that use a blend of stocks and bonds to limit risk, such as Target Date or Multi-asset funds, a difference from the benchmark may be due to a difference in the proportion of stocks to bonds in the fund when compared to the benchmark. Past performance does not indicate how an investment will perform in the future.

TIAA-CREF

The most up-to-date information about your investment options can be found online at www.tiaa-cref.org/planinvestmentoptions**,** enter your plan ID, 100866, and you'll be directed to plan and investment information.

Visit www.tiaa-cref.org for information and resources to help you make informed decisions. To request additional plan information or a paper copy of information available online, free of charge, contact TIAA-CREF at 800 842-2252 or write to us at TIAA-CREF, P.O. Box 1259 , Charlotte, NC, 28201.

Table 1 *shows fee and expense information for the investment options listed including the Total Annual Operating Expenses expressed as a percentage and a dollar amount based upon a $1,000 accumulation both as net and gross of expenses. Total Annual Operating Expenses is a measure of what it costs to operate an investment, expressed as a percentage of its assets, as a dollar amount or in basis points. These are costs the investor pays through a reduction in the investment's rate of return.*

Table 2 – Fixed Return Investments

TIAA-CREF			
Name/Type/Option	Return	Term	Additional Information
Guaranteed Annuity			
TIAA Traditional-Group Supplemental Retirement Annuity	3.00%	Through 02/28/2013	The current rate shown applies to premiums remitted during the month of July 2012 and will be credited through 2/28/2013. This rate is subject to change in subsequent months. Up to date rate of return information is available on your plan-specific website noted above or at 1 800 842-2733. TIAA Traditional guarantees your principal and a minimum annual interest rate. The guaranteed minimum interest rate is 3.00%, and is effective while the funds remain in the contract. The account also offers the opportunity for additional amounts in excess of the guaranteed minimum interest rate. When declared, additional amounts remain in effect for the twelve-month period that begins each March 1.

Table 2 – Fixed Return Investments

TIAA-CREF

Name/Type/Option	Return	Term	Additional Information
TIAA Traditional-Retirement Annuity	3.00%	Through 02/28/2013	The current rate shown applies to premiums remitted during the month of July 2012 and will be credited through 2/28/2013. This rate is subject to change in subsequent months. Up to date rate of return information is available on your plan-specific website noted above or at 1 800 842-2733.TIAA Traditional guarantees your principal and a minimum annual interest rate. The guaranteed minimum interest rate is 3.00%, and is effective while the funds remain in the contract. The account also offers the opportunity for additional amounts in excess of the guaranteed minimum interest rate. When declared, additional amounts remain in effect for the twelve-month period that begins each March 1. Subject to the terms of your plan, once your TIAA Traditional balance exceeds $2,000 withdrawals and transfers out must be spread out in ten annual installments.
TIAA Traditional-Supplemental Retirement Annuity	3.00%	Through 02/28/2013	The current rate shown applies to premiums remitted during the month of July 2012 and will be credited through 2/28/2013. This rate is subject to change in subsequent months. Up to date rate of return information is available on your plan-specific website noted above or at 1 800 842-2733. TIAA Traditional guarantees your principal and a minimum annual interest rate. The guaranteed minimum interest rate is 3.00%, and is effective while the funds remain in the contract. The account also offers the opportunity for additional amounts in excess of the guaranteed minimum interest rate. When declared, additional amounts remain in effect for the twelve-month period that begins each March 1.

Part II. Annuity Information

The information below focuses on the annuity options under the plan. Annuities are insurance contracts that allow you to receive a guaranteed stream of payments at regular intervals, usually beginning when you retire and lasting for your entire life. Annuities are issued by insurance companies. Guarantees of an insurance company are subject to its long-term financial strength and claims-paying ability.

TIAA-CREF

TIAA Traditional Lifetime Income Option

Objectives / Goals:

To provide a guaranteed stable stream of income for your life and if you choose, the life of an annuity partner. A TIAA Traditional Annuity provides income stability by providing a minimum guaranteed interest rate as well as the potential for additional interest. TIAA Traditional can be part of a diversified retirement portfolio that may include stocks (equities), bonds (fixed income), real estate, and money market investments. Electing a life annuity is just one of many payout options available under the TIAA Traditional Annuity.

Pricing Factors:

The amount of your lifetime income is dependent upon many factors including:

- The type of annuity selected (single life, joint life, with or without guaranteed minimum periods), and your selection of either the standard or graded benefit method.
- The amount of accumulations converted to a life annuity.
- Your age and, if applicable, the age of your annuity partner.
- The projected returns of the TIAA Traditional Annuity.

Under no circumstances will you receive less than the guaranteed amount of income required under the annuity contracts. To learn more about investments that offer lifetime annuity income please access the web link provided in Part I.

Restrictions / Fees:

- You may not begin a one-life annuity after you attain age 90, nor may you begin a two-life annuity after you or your annuity partner attains age 90.
- Subject to contract terms, if your accumulation is less than $5,000 on your annuity starting date, TIAA may choose instead to pay your accumulations to you in a single sum.

- If your TIAA annuity payment would be less than $100, TIAA has the right to change the payment frequency which would result in a payment of $100 or more.

Once you have elected a lifetime annuity, your election is irrevocable.

TIAA Real Estate and CREF Variable Annuity Lifetime Income Options

Objectives / Goals:

To provide a variable stream of income for your life and if you choose, the life of an annuity partner. This lifetime annuity provides a variable income that you can not outlive. A variable Annuity can be part of a diversified retirement portfolio that may include guaranteed, stocks (equities), bonds (fixed income), real estate, and money market investments. Electing a life annuity is just one of many payout options available.

Pricing Factors:

The amount of your lifetime income is dependent upon many factors including:

- The type of annuity selected (single life, joint life, with or without guaranteed minimum periods)
- The amount of accumulations converted to a life annuity.
- Your age and, if applicable, the age of your annuity partner.
- The investment performance of the variable annuity account your annuity is based upon.

Variable annuity accounts don't guarantee a minimum income. Income fluctuates based on market performance and is directly tied to the accounts investment returns. A 4% annual investment return is assumed. Generally, if the actual return in a given year is greater than 4% the amount of annuity income will increase; if it is less than 4% the income will decrease. To learn more about investments that offer lifetime annuity income please access the web link provided in Part I.

Restrictions / Fees:

- You may not begin a one-life annuity after you attain age 90, nor may you begin a two-life annuity after you or your annuity partner attains age 90.
- Subject to contract terms, if your accumulation is less than $5,000 on your annuity starting date, TIAA-CREF may choose instead to pay your accumulations to you in a single sum.
- If your annuity payment would be less than $100, TIAA-CREF has the right to change the payment frequency which would result in a payment of $100 or more.
- Once you have elected a lifetime annuity income your election is irrevocable.

Please visit http://www.tiaa-cref.org/public/support/help/glossary/index.html for a glossary of investment terms relevant to the investment options under this plan.

Fees and expenses are only one of many factors to consider when you decide to invest in an option. You may also want to think about whether an investment in a particular option, along with your other investments, will help you achieve your financial goals. The cumulative effect of fees and expenses can substantially reduce the growth of your retirement savings. Visit the Department of Labor's website for an example showing the long-term effect of fees and expenses at **www.dol.gov/ebsa/publications/401k_employee.html.**

The returns quoted represent past performance, which is no guarantee of future results. Returns and the principal value of your investment will fluctuate. Current performance may be higher or lower than that shown, and you may have a gain or a loss when you redeem your investments. Expense ratios shown are based on the most recent information available, but may not reflect all updates. Please consult the most recent prospectus or offering document for more detailed information.

If a fund or annuity account includes performance for periods beyond its inception date that performance is based on the performance of an older share class of the fund/account. Such performance has not been restated to reflect expense differences between the fund/account and that of the older share class. If expense differences had been reflected, performance for these periods would be lower or higher than stated.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Neither TIAA nor its affiliates has independently verified the accuracy or completeness of this information.

The Morningstar Category classifies a fund based on its investment style as measured by underlying portfolio holdings (portfolio statistics and compositions over the past three years). If the fund is new and has no portfolio, Morningstar estimates where it will fall before assigning a more permanent category. When necessary, Morningstar may change a category assignment based on current information.

There are inherent risks in investing in mutual funds including loss of principal. Please read the prospectus and carefully consider the investment objectives, risks, charges and expenses before investing.

Fidelity Footnotes

Expense Ratio

For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets.

Investment Risk

Because of their narrow focus, sector funds may be more volatile than funds that diversify across many sectors. Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Investments in mid-sized companies may involve greater risk than those of larger, more well-known companies, but may be less volatile than investments in smaller companies. Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation. Investments in smaller companies may involve greater risk than those in larger, more well-known companies. Fidelity Freedom Funds are designed for investors expecting to retire around the year indicated in each fund's name. Except for the Freedom Income Fund, the funds' asset allocation strategy becomes increasingly conservative as it approaches the target date and beyond. Ultimately, they are expected to merge with the Freedom Income Fund. The investment risks of each Fidelity Freedom Fund change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap and, commodity-related, foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. In general the bond market is volatile and bonds entail interest rate risk (as interest rates rise, bond prices usually fall and vice versa). This effect is usually pronounced for longer-term securities. Bonds also entail the risk of issuer default, issuer credit risk and inflation risk. An investment in a money market fund is not insured or guaranteed by the FDIC or any other government agency. Although money market funds seek to preserve the value of your investment at $1 per share, it is possible to lose money by investing in these funds.

Before investing in any investment option, please carefully consider the investment objectives, risks, charges, and expenses. For this and other information, call Fidelity at 800-343-0860 or visit www.fidelity.com/atwork for a free mutual fund prospectus or, if available, a summary prospectus. For information on other investment options,

contact Fidelity to request a fact sheet. Read it carefully before you invest.
