

Academic Information & Systems: Hyperion and IE 10 Compatibility

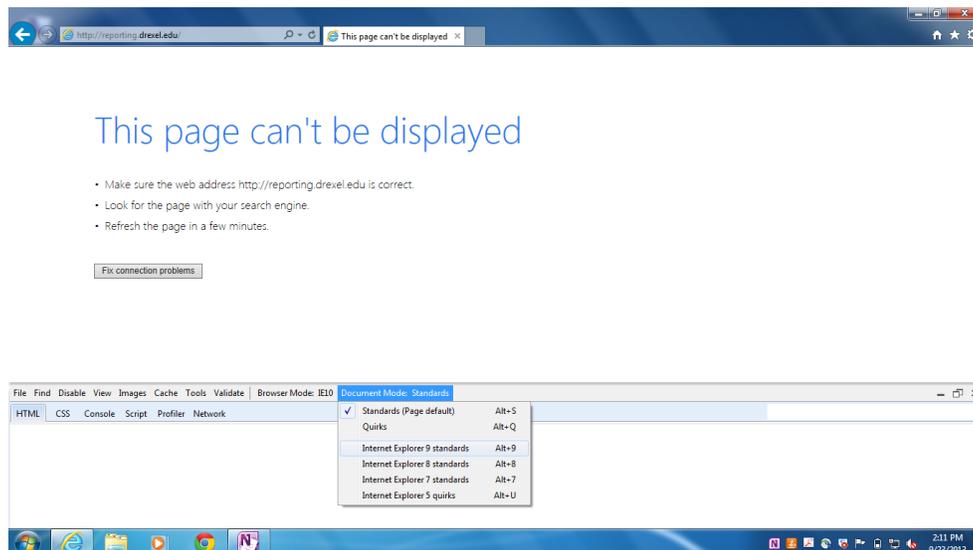

Using Hyperion with Internet Explorer 10

Problem: Unable to view login screen and receive error that the page cannot be displayed.

1. Go to Tools → F12 Developer Tools
 - a. If Menu bar is not visible, tap the Alt key to display the menu bar.
 - i. Shortcut is to just press F12

2. In the Developer Tools section, click “Document Mode: Standard” and then select “Internet Explorer 9 Standards.”
 - a. This only affects the current tab that you are displaying and does not change any preferences. This will need to be done each time you open Hyperion in a new window or tab.

Academic Information & Systems: Hyperion and IE 10 Compatibility

3. Retry accessing. You can close the Developer Tools window at the bottom of the browser.
