

Usual Care for Autism Survey (UCAS)

Drexel University, in collaboration with partners at other academic centers across the country, is conducting a research study to learn more about the *practices that are currently being used by community providers for older youth with ASD*.

You may be eligible to participate in our research study if:

- You currently teach or provide non-pharmacological treatment to youth with ASD between the ages of 7-22 years old.
- You are a Psychologist, Behavior Therapist, Doctor, Nurse or Nurse Practitioner, Occupational or Physical Therapist, Counselor, Marriage & Family Therapist, Social Worker, Speech-Language Provider or Therapist, or Teacher, Educator, Aide or other School Professional who works directly with youth with ASD.

We would be delighted if you would participate in this research study. However, your participation is voluntary!

Participation will include:

- Completing the Usual Care for Autism Survey (UCAS):
 - You will be emailed a link to the online survey and will answer questions about the types of youth with ASD you support and the strategies you use to support them.

As a thank you for your time and for completing the entire survey:

- You will receive a \$40 gift card.

By participating in this research study:

- You will help us better understand provider approaches and perspectives about different treatment strategies for youth with ASD.
- This will inform clinical research and may also help share information amongst practitioners regarding the most common and beneficial strategies for youth with ASD.

If you would like to sign up to be invited by email to participate in the Usual Care for Autism Survey (UCAS) this summer please click here:
