Notes:

- 192 Credits are needed for graduation. In addition, an ECE student must have a 2.0 cumulative overall GPA and a 2.0 cumulative GPA in their ECE courses.
- General Education Electives are seven courses taken from the COE approved list. One of these courses must be PHIL 315.
- ECES 301 Transforms Methods I and ECES 303 Transform Methods II are required for all EE majors.
- ECE Electives (ECEX courses) are 13 courses or at least 42 credits of ECEX courses. At least 9 credits must be in the major at the 400-level or higher. Up to 12 credits of ECE Electives may be taken from other COE departments or BIOMED or Computer Science as long as the courses are at the 300-400 level. Note: ECEP 404 or ECEP 371 Intro to Nuclear Engineering does not count as an ECE Elective unless combined with PHYS 330.
- * Choice courses may include PHYS 202 Fundamentals of Physics IV, ENGR 210 Thermodynamics, MATH 221 Discrete Math, CHEM 103 Chemistry III or a BIO/BMES courses with ECE Department approval.
- Math Elective is a 3-4.5cr course from MATH at a 200-level or higher. MATH 291 (Complex & Vector Analysis) is encouraged for EE Majors, and MATH 221 (Discrete Math) is encouraged for CE Majors.
- The number of free elective credits will depend on the individual plan of study. Students who have taken 4 credit ECE elective courses will need fewer free elective credits. Those who took 3 credit courses will need more. The total of all credits taken must add to at least 192 for the EE degree.
