Civil Engineering

Civil engineers are active in the planning, design, construction, research and development, operation, maintenance, and rehabilitation of large engineering systems. A particular focus of the field is the reconstruction of the nation’s infrastructure through solutions that minimize the disruption of social and natural environments.

The Bachelor of Science in Civil Engineering (BSCE) is a broad and flexible program, covering the entire range of civil practice from environmental to structural design, and from project management to engineering geology. Students may specialize in any of the technical branches, including:

- Structural and Materials
- Geotechnical and Geological
- Environmental
- Municipal and Transportation
- Construction Management and Engineering
- Hydraulics and Water Resources

Graduates are grounded in the fundamental principles necessary for the practice of this profession in any of its modern branches, including construction management, water resources engineering, structural engineering, geotechnical engineering, transportation engineering, and environmental engineering.

Students wanting specific information about the major are encouraged to stop by the department office at Curtis Hall, room 251, call the department at 215-895-2341, or visit their website at www.drexel.edu/academics/coe/cae/default.asp.

Job Titles

</table>

Employers who have hired Drexel students include:

- AECOM/DMJM & Harris
- Children’s Hospital of Philadelphia
- CDM
- ConeTec Inc
- Hill International
- Pennoni Associates, Inc.
- Philadelphia Dept. of Commerce
- Philadelphia Water Department
- T. N. Ward
- U.S. Army Corps of Engineers
- Urban Engineers
- URS Corporation

Please refer to the SCDC website (www.drexel.edu/scdc) for our most recent co-op salary information.
