MECHANICAL ENGINEERING

The role of mechanical engineers is rapidly changing. Advances in manufacturing, transportation, infrastructure systems, materials, communications, and high-performance computing have introduced new demands, opportunities, and challenges. Today's industries require mechanical engineers to possess diverse interdisciplinary skills, a global viewpoint, entrepreneurial and managerial abilities, and an understanding of the forces governing the marketplace.

The curriculum is designed to balance technical breadth (provided by a set of fundamental required core courses) with technical depth (provided by optional concentrations that emphasize particular fields within the profession). The program not only prepares its graduates to become successful mechanical engineers needed in industry and government, but also provides an excellent springboard to pursue graduate studies in engineering, medical sciences, law, business, information technology, and any other disciplines in which technological and analytical skills play an important role.

Students wanting specific information about the major are encouraged to visit the department office in Randell Hall, room 115F, call the department at 215-895-2336 or visit their website at www.mem.drexel.edu.

Employers who have hired Drexel students include:

- Acero Precision
- Ametek Aerospace Products
- Boeing
- CDI Corporation
- General Electric
- Lindab, Inc.
- Lockheed Martin
- Naval Surface Warfare Center
- Nevada Automotive Testing Center
- Parker Hannifin
- STV Inc.
- Traffic Planning & Design Inc.
- Volvo

JOB TITLES

- Design Engineer
- Facilities Engineer
- Manufacturing Engineer
- Nuclear Engineer
- Process Control Engineer
- Research Associate
- Transportation Engineer
- Quality Assurance Engineer
- Power Engineer
- Product Development Engineer

Please refer to the SCDC website (www.drexel.edu/scdc) for our most recent co-op salary information.
