Reducing Philadelphia's Greenhouse Gas Emissions 80% by 2050

Katherine Gajewski

Director, Mayor's Office of Sustainability

Patrick Gurian

Associate Professor, Civil, Architectural, and Environmental Engineering

Hugh Johnson

Senior Associate, Drexel Institute for Energy and the Environment

Wednesday, November 4th at 4pm

**Drexel University, Mitchell Auditorium, Bossone Building
3120-24 Market Street, Philadelphia, PA**

Stabilizing the climate system requires aggressive reductions in carbon and other greenhouse gases. Over the past year, Drexel students and faculty have been studying potential pathways for achieving reductions of up to 80% in Philadelphia. Katherine will discuss trends in the city's emissions and goals; Drexel faculty will present their research.

Refreshments will be served. There will be a Q&A and opportunity to talk with team.

Additional Authors and Collaborators: A. Emin Aktan, Ahsan Alam, Sarah Collins, Richardson Dilworth, Chloe Dye, Eugenia Victoria Ellis, Romano Foti, Charles N. Haas, Marianne Hatzopoulou, Christian Hunold, Eliya Hurd, Franco Montalto, Sean-Erik O'Donnell, Abhimanyu J.Patwa, Michael Schickling, Sabrina Spatari, Jin Wen, Robert Zolitor

PLEASE RSVP FOR BOTH IN-PERSON AND WEBINAR ATTENDANCE:
