This map shows the location of homes that sold for 1 million dollars or more in 2014 Q4.
Philadelphia Region Avg. DOM*: Houses v. Condos

DOM is the average "days-on-market": the average number of days it takes for a listed home to sell. In a market that is evenly balanced between buyers and sellers, 40-60 days is considered the typical norm.
Philadelphia Region Months of Supply*: Houses v. Condos

*Months of Supply is how many months it would take to sell off the current inventory of listed homes, given the current pace of sales.
Pennsylvania Foreclosure Heat Map

1 out of every 703 homes in Philadelphia is currently in the process of foreclosure, which is the same foreclosure rate as in the previous quarter.

South Jersey’s foreclosure rate is currently much higher than Pennsylvania’s. Currently, 1 out of every 180 homes in Camden is currently in the process of foreclosure, followed by 1 out of every 181 homes in Atlantic County, 1 out of every 191 homes in Salem County and 1 out of every 199 homes in Cumberland County.

Now that the housing market's recovery appears to have arrived, this chart shows how much house prices need to rise in each city in order to erase the cumulative losses from the bust. The total rebound (to date) in house prices is shown by the blue bars, while the remaining losses are shown by the red bars. For example, the Philadelphia region's average house prices fell by a cumulative 23% from peak to trough. To date, they have rebounded by 7%, which implies they need to rise another 16% in order to return to their pre-bust peak levels.
