

OR

Drexel University Recruiting Volunteers for a Research Study

Research Title

Example 1: A study of Philadelphia neighborhoods to show a connection between close social bonds and personal wellness

Example 2: Flu study for Drexel University Students

Research Objectives*

Provide purpose of the research in summary form.

Example 1: People are healthier and happier when they have intimates who care about and for them. But they also do better when they know many different people casually. We are involved in a year-long study designed to understand whether knowing many kinds of people in your neighborhood is helpful because it improves personal health and well being. This survey is conducted anonymously and takes approximately 30 minutes to complete.

Example 2: The School of Public Health invites Drexel University students to participate in a 16-week study of the effectiveness of the flu vaccine. The study involves completing nine online questionnaires.

*Please provide a summary on how often, how long it would take to complete the research study, survey or interview.

Information for Research Subjects Eligibility

Provide the eligibility criteria that will be used to admit subjects into the study.

Example 1: You can participate in this study if you are 18 – 65 years of age, native of Philadelphia, be able to read and speak English and have lived in the same community for longer than 10 years. If you meet the above criteria, please contact us using the contact information provided below.

Example 2: You must be at least 18 years old, a Drexel University student eligible for health care at Student Health Service at Drexel University and have an access to the Internet.

Remuneration

If you are not giving remuneration, do not include this section.

If you are giving remuneration state what you will pay or give a gift certificate or give the following gift package consisting of, which amounts \$...../visit or \$...../study.

Location of the research and person to contact for further information

This research is approved by the Institutional review board.

If you are interested in participating in this study, please contact

Name(s) of the person(s)

Telephone number (**OFFICE OR DEPARTMENT PHONE NUMBER**)

Room number where subjects meet the contact person

Please do not provide your (OR researcher's) e-mail address

(Suggestion: Sign up for a "Disposable" email account ex: @yahoo.com or @Gmail.com, etc)

This research is conducted by a researcher who is a member of Drexel University or Drexel University College of Medicine).
