	humans to compare the usefulness of the product with other products or procedures which are in current use or recognized as useful), all labeling bears the statement, prominently placed: "For Investigational Use Only. The performance characteristics of this product have not been						
	established."						
	The study uses one of more of the following: (Check all boxes that are true. One must be checked)						
	Specimens collected for routine clinical care or analysis that would have been discarded.						
	Specimens obtained from specimen repositories.						
	Leftover specimens that were previously collected for other research purposes.						
		t is not known to the investigator or any o		estigation, including the sponsor			
	meaning neither the invest	stigator nor any other individuals associa	ted with the investigation, including the	sponsor can readily ascertain the			
	identity of the subject.						
	One of the following is true: (Check all boxes that are true. One must be checked)						
	Specimens are not coded where "Coded" means that 1) a number, letter, symbol, or combination thereof (i.e., the code) has replaced						
	identifying information (such as name or social security number) that would enable the investigator or any other individuals associated with						
	the investigation, including the sponsor to readily ascertain the identity of the individual to whom the specimen pertains; and 2) a key to						
	decipher the code exists, enabling linkage of the identifying information to the specimen.						
	Neither the investigator(s) nor any other individuals associated with the investigation or the sponsor can link the specimen to the subject						
	from whom the specimen was collected, either directly or indirectly through coding systems.						
	One of the following is true: (Check all boxes that are true. One must be checked)						
	The specimens are not accompanied by clinical information.						
	Clinical information that accompanies the specimens does not make the specimen source identifiable to the investigator or any other						
	<ul> <li>individual associated with the investigation, including the sponsor.</li> <li>The individuals caring for the patients are different from those conducting the investigation and do not share information about the patient with</li> </ul>						
	those conducting the investigation.						
	The individuals caring for the patients do not share information about the patient with those conducting the investigation.						
Ħ		led to the investigator(s) without identifie					
Π	The supplier of the specimens has established policies and procedures to prevent the release of personal information.						
4	4 Waiver of Informed Consent for Planned Emergency Research <sup>4</sup>						
	The research meets the criteria in "CHECKLIST: Waiver of the Consent Process for Emergency Research (HRP-419)."						
	The rescurent meets the c		Sense in The Cost of Emergency Rest
