

PHOTOGRAPHY

The photography curriculum is designed to provide the basis for both technical and aesthetic proficiency. Through a hands-on program blending traditional processes with the latest digital technologies, the photography curriculum provides all the tools necessary for aspiring artists/photographers to achieve a breadth of experience not generally developed in traditional fine art or commercial photography programs.

The photography major provides students with a unified fine arts/professional curriculum offering a wide range of studio, real-world, and academic experiences—intermixed with ongoing critiques and evaluation—including the studio, the darkroom, and the computer. The major prepares students to understand photography as a system of visual communication with its foundation in an ever-changing technology. Graduates may be employed in a variety of photo-related businesses, initiate their own photographic enterprises, or choose to go on to advanced studies.

The College's extensive photographic facilities are available to every photography major at Drexel. Incoming students are only required to bring a 35mm film camera that can be used on a manual setting.

For more information about this major, visit the College's Photography website-
