

ENVIRONMENTAL SCIENCE

Drexel's BS in Environmental Science degree has undergone exciting renovations as a result of the 2011 merger of Drexel University with the Academy of Natural Sciences of Philadelphia. The new curriculum capitalizes on the strengths of Drexel and Academy researchers, offering students a hands-on, research-rich experience that will prepare them for careers or graduate school in the environmental sciences.

The philosophy of the Department of Biodiversity, Earth & Environmental Science (the BEES department) is "*Field Experience, Early and Often,*" and students majoring in Environmental Science gain this experience during their orientation to Drexel, as an integral part of the curriculum, and through co-op work experiences.

The Environmental Science curriculum allows students to pursue a concentration of interest while receiving an overall breadth of knowledge from the core courses in the discipline. The following four concentrations are available: Biodiversity and Evolution, Earth Science, Ecology & Conservation, and Environmental Science.

Students wanting specific information about the major are encouraged to stop by the department office at 3201 Arch Street, Street 240, call the department at 215.571.4639, or visit their website at www.drexel.edu/bees.

Employers Who Have Hired Drexel Students Include:
Academy of Natural Sciences GEI Consultants, Inc. Philadelphia Water Department ConeTec Inc. Philadelphia Zoo State of New Jersey Department of Environmental Protection

JOB TITLES

Curatorial Assistant

Ecological Restoration Unit Co-op
Environmental Specialist

Water Resources Planning Co-op

Field Research Assistant

Laboratory Technician
Sustainability Co-op

Environmental Analyst
