

ENVIRONMENTAL SCIENCE

Drexel's BS in Environmental Science degree is actively involved with the Academy of Natural Sciences of Drexel University. The curriculum capitalizes on the strengths of Drexel and Academy researchers, offering students a hands-on research-rich experience that will prepare them for careers or graduate school in the environmental sciences.

The philosophy of the Department of Biodiversity, Earth & Environmental Science (also known as BEES) is "*Field Experience, Early and Often.*" Students majoring in environmental science gain this experience during their orientation to Drexel, as an integral part of the curriculum, and through co-op work experiences.

The Environmental Science curriculum allows students to pursue a concentration of interest while receiving an overall breadth of knowledge from the core courses in the discipline. The following four concentrations are available: Biodiversity and Evolution, Earth Science, Ecology and Conservation, and Environmental Science.

Students interested in specific information about the major are encouraged to stop by the department office at 3201 Arch Street, Suite 240, call 215.571.4639, or visit drexel.edu/bees.

Employers Who Have Hired Drexel Students Include:
Academy of Natural Sciences of Drexel University GEI Consultants, Inc. Philadelphia Water Department Philadelphia Zoo State of New Jersey Department of Environmental Protection
