Examining cognitive flexibility and bilingualism in children with and without autism

Invitation to Participate in a Research Study

The goal of this project is to study differences in flexible thinking in children with and without autism and with and without bilingual exposure. We are recruiting children for a one-time visit to the AJ Drexel Autism Institute. Families will receive \$25 compensation for their time.

If you are interested in participating, please contact:
tln36@drexel.edu or scan the QR code.

If you have a child between 3-5 years old, you may be eligible to participate!

How will this benefit you?

- You will receive a no-cost evaluation of your child's cognitive and social skills
