

# Drexel Business Inclusion Center

*Supporting businesses to build a diverse and inclusive workforce*

## Professional Development Solutions

Equip your leadership, human resource professionals, management teams, employees, and other staff with knowledge to foster an inclusive and neurodiverse workforce. Our sessions engage participants at all levels in a highly interactive, experiential learning environment to best support learning and growth.

### Topics Include:

#### Promoting a Neurodiverse Workforce

Participants will increase their understanding of autism, gain knowledge of the benefits of a neurodiverse workforce, and become familiar with strategies to create an innovative, inclusive work environment so all employees can thrive.

#### Best Practices for Supporting Employees on the Autism Spectrum

Managers, supervisors, and others will learn about and practice strategies to support employees on the autism spectrum. Strategies include making the physical environment more inclusive to employees on the spectrum, communicating effectively, and incorporating visual supports into the workplace.

#### Customized Training

We will work with your business or agency to develop a training, workshop, or professional development series that meet your diversity, equity, and inclusion goals.

## Our Team

Our team of consultants is made up of specialists including nonprofit leaders, educators, and clinicians with years of experience providing professional development solutions and leading programs that serve people on the autism spectrum. The Drexel Business Inclusion Center is led by Transition Pathways of the A.J. Drexel Autism Institute in collaboration with Community Integrated Services.
