

Drexel MS in Information LIS Program Learning Objectives

1. Professional Values and Ethical Foundations

1. **Analyze the social and technological contexts** that shape the work of information professionals.
2. **Demonstrate commitment to core professional values**, including social justice, intellectual freedom, and privacy.
3. **Evaluate and apply information policies, laws, and standards** to support ethical technology use and equitable access to information and technology.

2. Organizational Leadership and Management

4. **Lead and manage information organizations** through equitable planning, budgeting, fundraising, and policy development.
5. **Use research and data** to illustrate the value of libraries and information agencies and to support information and technology strategies.

3. Community Engagement and Service Design

6. **Assess the information needs of communities** and design inclusive and accessible programs, resources, and services to address varied community needs.
7. **Develop and implement strategies to enhance information literacy** for individuals and communities.

4. Information Stewardship and Digital Literacy

8. **Guide users in creating and managing digital identities and materials** effectively.
9. **Sustainably appraise, organize, manage, and preserve** digital and physical assets that are reflective of a diverse society, and help communities and individuals preserve their own identities and heritage.
