

Mission Command Gateway

PRODUCT

- Battlefield Information Dissemination and Management
- Strong semantic representation of digital orders and reports

KEY CUSTOMERS

- US Army RDECOM, CERDEC
- Demonstrated at the C4ISR On The Move 2010 and C4ISR Network Modernization 2011 experiments
- Interoperability tested with German, French, Israeli, and Italian military systems
- Certified Technical Readiness Level 6
- Transitioned to Joint Friendly Forces Tracking (J-FFT) test bed

KEY PARTNERS

- EOIR Technologies, Cougaar Software Inc, Sagem Défense Sécurité, Diehl BGT Defence GmbH

CAPABILITIES

- Collaborative drafting of digital operation orders and related documents
- Distributed management of Common Operational Picture
- Interoperability bridges for interfacing with many command and control systems includes PASS/DDS, CPoF, and JBCP

DISCRIMINATORS

- Provides an agile experiment test bed not encumbered by restrictions that slow down most programs of record
- Deeper semantic representation of order message enables software agents to aid the user in ways not otherwise possible
- Users can continue their work during network outages or splits and automatically synchronize changes when connectivity is restored
