

Biological Sciences (BS)

PROGRAM OVERVIEW

Home to one of the largest undergraduate student bodies at Drexel, the Department of Biology is a leader in STEAM education, incorporating the latest techniques and leading the design of new curricular approaches to enhance student learning.

Discoveries in the biological sciences influence many aspects of our daily lives and have become the foundation of many new developments in biotechnology and medicine.

In the past two decades, advances in molecular biology, cell biology and genetics have been rapid, opening many new and exciting career opportunities in biotechnology, genetic engineering and the development of new diagnostics and therapeutics.

Biology graduates have pursued careers in **MEDICINE, RESEARCH OR COMMERCIAL LABORATORIES, PRIVATE AND GOVERNMENT AGENCIES, ACADEMIA, GENETIC COUNSELING, CLINICAL TRIALS COORDINATION, BIOINFORMATICS, GENOMICS, CLINICAL LAB MEDICINE, PUBLIC HEALTH, POLICY, SCIENCE JOURNALISM AND LAW.**

DEGREES OFFERED

THE BACHELOR OF SCIENCE IN BIOLOGICAL SCIENCES provides the breadth of knowledge needed in biology, while allowing students flexibility to choose an area of focus. Six concentrations are available: **Cell, Molecular Biology, Genetics & Biochemistry; Organismal Biology & Physiology; Pathobiology; Ecology, Evolutionary Biology & Genomics; Cell & Gene Therapy; and General Biology.**

ACCELERATED BS/MS PROGRAMS enable academically qualified students to earn both a BS and MS within five years of study. Students may apply for admission after completing 90-120 undergraduate credits and must have at least a 3.5 GPA. Accelerated programs couple a **BS degree in Biological Sciences** with an **MS degree** in either **Biological Sciences** or **Epidemiology**.

MINORS

Bioinformatics combines coursework in biology, computer science and software engineering. This minor is ideal for students interested in a computational approach to studying the life sciences.

Neuroscience integrates content from cellular, molecular and systems neurobiology with neuropsychology, providing a strong foundation neurobiology and neuropsychology.

PATHS TO MEDICAL SCHOOL

TRADITIONAL PATH

Students apply to medical schools across the country in the spring of their junior year.

BS + MD EARLY ASSURANCE

An opportunity to enter the Drexel University College of Medicine after four years of undergraduate study at Drexel, including a six-month co-op experience. Qualified incoming freshmen must be ranked in the top 10 percent of their class, have a minimum 3.5 GPA on a weighted 4.0 scale and a combined SAT of at least 1420 or ACT score of 32.

INNOVATIVE CURRICULUM

The BS in Biological Sciences curriculum helps students to Notable courses offered within this department include:

- SEA-PHAGES and SEA-GENES
- Biology of Cancer
- STEM Cell Research
- Pathophysiology
- Discovering Antibiotics
- Neurobiology of Autism Disorders
- Virology
- Biology of Stress

DREXEL CO-OP

Co-operative education options prepare biology students to pursue advanced education and careers across wide-ranging areas. Previous co-op placements include:

**SPARK THERAPEUTICS • GLAXOSMITHKLINE •
ASTRAZENECA • VIROPHARMA • FOX CHASE
CANCER INSTITUTE • MOSS REHAB • CHILDREN'S
HOSPITAL OF PHILADELPHIA AND MANY MORE.**

BEYOND THE CLASSROOM

GLOBAL ADVENTURES

Biology students are invited to expand their horizons by participating in study and research abroad opportunities which allow for great personal growth, academic enrichment and the chance to explore the world while gaining hands-on experience in the discipline. Biology students have examined health care in Costa Rica; conducted research in molecular biology labs in China; and explored diversity in culture and education in London, Scotland, Germany and Australia, just to name a few.

RESEARCH OPPORTUNITIES

The biology department is housed in the state-of-the-art Papadakis Integrated Sciences Building, a Gold LEED-certified research facility featuring a five-story biowall. Students have the opportunity to engage in research throughout their undergraduate years through the Drexel Co-op program or by joining the lab of a biology faculty member or faculty at the Drexel College of Medicine. Students engaging in research also have the opportunity to complete a senior thesis in biology.

STUDENT CLUBS AND ORGANIZATIONS

- Beta Beta Beta – National Biological Honor Society
- Association for Undergraduate Biological Science Students
- Phi Delta Epsilon (PhiDE) – International medical fraternity for future physicians
