

College of Arts and Sciences

ARTS & SCIENCES OVERVIEW

The College of Arts & Sciences is a place where students, faculty and staff work to shape the **future of our world** together. At the core of arts and sciences is the understanding that in order to thrive in today's global landscape, we must consider the human need and desire for **local, national and global progress**. Moreover, our constantly evolving and fast-paced culture requires a new approach to a liberal arts education that embraces **traditional classroom learning with the real-world knowledge** made possible by experiential learning.

In order to address modern problems, the College of Arts & Sciences calls upon versatile and agile individuals who ask the right questions, make insightful observations and communicate effectively.
