AJ Drexel Cybersecurity Institute Symposia

Healthcare data protection, mobile applications and HIPAA-HITECH; presented by Ben Goodman.

A comprehensive look at organizational and technical challenges to secure privacy of protected health information in the fast evolving world of smartphone enabled health care applications.

Speakers will represent the technical, legal, policy and risk management perspectives.

Date: February 25, 2015

Time: 12:00PM

Location: 3401 Market Street, Suite 300

Scholarship For Service (SFS)

Scholarship For Service (SFS) is a unique program designed to increase and strengthen the cadre of federal information assurance professionals that protect the government's critical information infrastructure. This program provides scholarships that may fully fund the typical costs incurred by full-time students while attending a participating institution, including tuition and education and related fees. Additionally, participants receive stipends of up to \$20,000 for undergraduate students, \$25,000 for master's degree students and \$30,000 per year for doctoral students. The scholarships are funded through grants awarded by the National Science Foundation.

2014 Cyber Attacks Statistics

The following is attached as a macro-indicators of the threat landscape and the corresponding trends.
