Spotlight: Matthew C. Stamm, Assistant Professor

Matthew C. Stamm is Assistant Professor at Drexel University's College of Engineering, where he leads the Cybersecurity and Information Management (CIM) Graduate Program.

While holding the Multimedia and Information Security chair at Drexel, Stamm has developed a passion for cybersecurity and information security with a specific focus on media security and cyber intelligence. Much of his research involves developing and applying media security and cyber intelligence techniques to detect multimedia forgery, such as facial images and videos. His research is creating specific methods and analytical techniques to detect and eliminate multimedia and cyber threat attacks.

Do Not Miss... 

February 2015 - Drexel University Cybersecurity Awareness Month

C’mon, Cybersecurity is Fun and Easy!

October 2015 - National Cybersecurity Awareness Month

Dr. Matthew Stamm

As cyber security is a huge issue, the Department of Homeland Security and the National Cybersecurity Alliance (NCFA) have created the National Cybersecurity Awareness Month (NCAM) to educate consumers about these issues. It has been observed during the month of October and is purchased to encourage everyone to educate the importance of cybersecurity and protection by computer users against online cyber threats.

October 15 - National Cybersecurity Awareness Month

Dr. Matthew Stamm

As a cyber security expert, the National Cybersecurity Awareness Month (NCAM) is an important initiative that educates the public about the importance of cybersecurity. It is observed during the month of October and encourages consumers to educate themselves on the risks of cyber threats and take steps to protect their devices and information.
