

# ONLINE INFECTION PREVENTION AND CONTROL PROGRAMS

Drexel University's online programs in infection prevention provide the foundation for a career addressing infectious disease processes, surveillance, and safe public health and health care environments. These innovative programs are taught by field experts and prepare students for success in various public health careers.

## PROGRAM FEATURES

- Apply biological principles to the development and implementation of disease prevention, control, or management programs
- No GRE required
- Fully online

## HEAR FROM A STUDENT

"When I saw the program's depth in epidemiology, outbreak management, and leadership, I knew it would enhance my ability to lead and innovate within the field."

Kwang-Seok Kang,  
MS in Infection Prevention  
and Control
