Signature of research advisor Date
Senior Thesis Proposal: Title here

Delete anything with a grey background in this document. The entire proposal should be 1-2 pages.

**Abstract:** (<200 words): Summarize the goals of the project. Briefly describe the importance of the research and the technical activities that will be accomplished.

**Introduction:** (1-2 paragraphs): Provide a detailed background to the project, including (i) the general significance of the field; (ii) current notable state-of-the-art work, (iii) unanswered questions and opportunities for study. Conclude with one or two statements describing the goals of the current project. [Note the introduction must reference at least two scholarly journal or conference articles]

**Proposed Work and Timeline:** (1-2 pages): Provide a general description and schedule of the proposed work over the three quarters of the project. Be specific, but concise, and include the rationale for research tasks. As much as possible, provide expectations for success, and contingency plans to accommodate challenges. Bulleted lists (with appropriate detail) are suitable.

**Dissemination and Presentation Strategy:** (1 paragraph) Provide a brief description of plans to communicate research results to the academic and/or general community, beyond the research group of the faculty advisor. Note that a defense is required, but can be substituted with an external presentation with advisor permission.
