

Bachelor of Science in General Studies

Find Your Fire

General Studies is for the student who is not afraid to learn and experience a diverse array of subjects in order to become a well-rounded citizen of academe. A degree in General Studies will give you a **competitive advantage** over other students because you will be exposed to more than just one discipline, allowing for a more varied education and understanding of real-world experiences.

The ability to include minors as “stackable credentials” within the General Studies major can be of great value to working adults who are seeking advancement or a change in their employment. Students in the workforce looking to improve their earning potential often find that a degree makes them eligible for higher-level positions within their organizations or others.
