

# CLOSE SCHOOL OF ENTREPRENEURSHIP

GRADUATE STUDIES

The Close School of Entrepreneurship prepares students to be founders and CEOs of their own companies, work in new and growing ventures, and become innovation officers within corporate settings. Taught by world-class faculty, courses in Close focus on professional entrepreneurial characteristics to differentiate students within their fields, such as initiative, calculated risk-taking, creativity, and problem solving.

With a broad definition of entrepreneurship encompassing more than the technical process of launching new companies, the school's curriculum emphasizes developing the entrepreneur as a person, as well as teaching the process of entrepreneurship. And Drexel's Baiada Institute for Entrepreneurship acts as an incubator, offering resources, mentoring and individual space for students to embark on their next creative endeavor.

Enlightened by the entrepreneurial mindset, students graduate ready to develop a culture of innovation within their companies or launch new ventures into the world. The next generation of leadership begins here.
