

# DORNSIFE SCHOOL OF PUBLIC HEALTH

GRADUATE STUDIES

Drexel University is home to the first fully accredited school of public health in the Philadelphia region, the Dornsife School of Public Health. The school's programs combine rigorous training with hands-on, practical experiences and students benefit from engagement with a broad set of community partners and collaborators.

The expert faculty at Dornsife strive to understand what drives the health of populations and what can be done to make them healthier in order to make an impact on the health of cities all over the world. Providing unmatched opportunities for students to gain real-world experience in Philadelphia and across the globe, Dornsife partners with policy makers and communities to eliminate health disparities and translate evidence into practice and policies.

Founded on the principle that health is a human right, students learn from the diverse and vibrant community in Dornsife and adapt their commitment to promoting health equity by generating rigorous evidence and transforming that evidence into action. The next generation of leadership begins here.
