Registration is now open for the graduate-level course ISTM 511:

**Foundations in Evidence-Based STEM Pedagogy**

Winter Quarter 22-23
Tuesdays from 4:00 - 6:50 PM
The course is taught by Eric Brewe, Associate Professor in Physics and Science Education

Course attendees will:
- Engage as members of a community of discipline-based education research (DBER)
- Enact their skills at putting theory and experimental work into practice (in real educational settings)
- Establish a teaching philosophy
- Provided constructive criticism of STEM instruction

This course is the foundational course in PROFESS, a program that prepares graduate students for future academic faculty positions. To learn more click on the QR code below.
