SALURBAL, A LAC-URBAN HEALTH INITIATIVE

The Salud Urbana en America Latina or Urban Health in Latin America (SALURBAL) Project brings together over 200 professionals from multiple disciplines to study the ways urban environments and urban policies impact the health of city residents throughout Latin America. Project findings inform policies and interventions to create healthier, more equitable, and more sustainable cities worldwide. SALURBAL is funded by the Wellcome Trust and is the main initiative of the Urban Health Network for Latin America and the Caribbean (LAC-Urban Health).

Over 20 SALURBAL team members are participating in plenary, abstract, and panel sessions across the four days of the 2022 International Conference on Urban Health.
