

**Accession #30
Jean Gowing**

2.5 linear feet textual materials (including photographs)
1 record carton containing 3 artifacts
Dates: [1914 – (1950 – 1987)]

Description

Records from Dr. Gowing's student days, including some photographs; correspondence with WMC alumnae; professional papers; teaching materials; records from her pediatric work; WMC alumnae association; WMC admissions policy at WMC, including personal notes regarding co-education. Materials show a member's view of MWIA, including some photographs.

Some files are in acid-free folders but nothing has been physically processed.

Box #1 Artifacts: bottle, instruments, umbilical cord treatment
Box #2 Correspondence, teaching materials, WMC/MCP alumnae
Box #3 photographs (MWIA and misc), papers, MWIA, AMWA publications
Inventory of boxes completed June 2000, attached.

MWIA

I estimate about .3 linear feet are MWIA-related. These materials are mainly related to Gowing's paper on Trisomy 18 presented at the 1962 Congress; to MWIA's meeting in Philadelphia in 1950; and travel plans to other meetings.

Research strengths

Research strength is in Gowing's relationship and history with WMC in 1920s and forward: her medical school records; communication with classmates; photographs from student period (some show original WMC building in background); her teaching materials; and her involvement and perspective on the 1960s' admission policy.

Processing time

Estimating 25 - 30 hours per linear foot to arrange and describe at folder level, processing the entire collection would take roughly 63 to 75 hours (or 8 to 10 full days).
