Archivist's note re processing:

The contents of this artificial collection on medical missionaries were culled from other collections of institutional or organizational records and personal papers, prior to 1990. Some items, for which provenance could be clearly identified, were returned to the collections from which they originated. (e.g. correspondence of the Dean of the Woman's Medical College of Pennsylvania)

A history and scope and content note will be written at a later date.
