

**Accession #113  
Leone Hellstedt**

1.25 linear feet  
3 doc boxes  
3 record cartons off-site (~3.75 linear feet)  
Dates: 1975-1978

Description

Collection consists of files of individual autobiographies for the development of the book *Women Physicians of the World*, edited by Hellstedt.

The cartons stored off-site, if transmittal records are accurate, consist of more files on each doctor, including photographs, CVs, reprints, and correspondence regarding the book.

The files in the stacks are in good order and need only a box list or finding aid.

Box #1 & #2 Autobiographical files. Three copies of each biography: originals (or barely edited) and copies with changes.

Box #3 Autobiographical files of Asian-American women physicians

Off-site boxes See attached inventory. Photographs, correspondence and biographical material of all participants.

MWIA

All MWIA relevant. All the physicians in the book were MWIA members, Hellstedt was a past-president of MWIA and the book was written with the support of the organization.

Research strengths

Unedited autobiographical material and correspondence are the research materials preceding the book. The materials potentially provide greater depth and detail of the portraits of these pioneering women from around the world.

These files are in good order and would not need much attention, just the writing of the finding aid. (this assumes that the order of the off-site files is similar to that of the boxes in the stacks).

Processing time

Collection is basically processed but has no description or box list. Will need to retrieve other materials to survey. A finding aid could be written in a week.
