

Descriptive statement (May be biographical):

Brief statement of contents:

1 scrapbook (1891-1940) - The person who organized this scrapbook (her identity is unknown) collected reviews of books dealing with such health-related topics as nursing, social work, psychology, nutrition, mental hygiene, child development, dentistry, health-related biographies and fiction, and topics related specifically to women such as women in history, the woman's movement, employment, marriage, etc. The copyright dates of these book reviews, which have been assembled in alphabetical order according to author, range from 1891 to 1941 although the majority were published in the 1930's.

Also included in this scrapbook (the last five pages) are 161 obituaries of women physicians whose dates of death cover a time span from 1926 to 1940. (Most of these obituaries give not only grief biographical data but also include the cause of death).
