

2026

Pharmacology & Physiology Summer Seminars

Tuesdays @ 11:00 AM

June
2

Harnessing the CCL5/CCR5 Axis to Overcome Resistance to MAPK Inhibitors in Melanoma

Binh Ha

PhD Candidate, Romano Lab – Drexel University College of Medicine

June
30

The Effects of Dopaminergic Signaling on HIV Infection in Human Neural Organoids

Yash Agarwal

PhD Candidate, Gaskill Lab – Drexel University College of Medicine

July
21

ST8SIA4-Mediated Polysialylation Promotes CD8+ T Cell Infiltration in Melanoma

Amirali Amirfallah

PhD Candidate, Hartsough Lab – Drexel University College of Medicine

August
4

Reactive Astrocytes Shape the Microenvironment of Melanoma Brain Metastases

Steve Rutledge

PhD Candidate, Jackson Lab – Drexel University College of Medicine

Presentations will be in-person at NCB Room 8312
