Library Access, Technical Issues & Credentials

General Access	Everyone who is eligible to access resources can access resources in the same way: by logging using their **DrexelOne username** and **password**
Borrowing Privileges • Listed by status	"Your access to the Libraries' resources is directly dependent on your relationship with Drexel University. If you feel your status does not accurately reflect this relationship, please contact your direct departmental supervisor to discuss this matter. Libraries staff are not authorized to change your account."
Print book shipping	"While we don't ship books to hospitals or Queen Lane just due to the logistics of how faculty members would receive those packages, we can ship eligible books (ex: not reserve or reference books) to their home addresses."
eResource Access	"Check to make sure that you are typing your username and password into a Drexel branded login screen. Your Drexel user ID and password will only work on a Drexel login screen (not, for example, when typed directly into a journal's website). If you are receiving an error message when entering your username and password on the Drexel Libraries branded login screen, contact LibAssist@drexel.libanswers.com"

Maximizing Your Library Access: Research and Teaching Resources for DUCOM Faculty
COMmon Grounds
Fall 2026

Services for Faculty	"Adjunct faculty members are eligible for access for the duration of their adjunct faculty contract. Retired faculty members can borrow physical books and access online resources while visiting Hagerty library via a dedicated laptop. Emeritus faculty retain full privileges."
Interlibrary Loan	If our library does not have access to a book, book chapter, or journal article you can utilize EZ Borrow and ILLiad.

Library Resources for research, teaching, and clinical support

Health Sciences Resources	Resources and databases in the health sciences. • Included databases/platforms: **Embase**, **Web of Science**, **Cochrane Library**, **Scopus**, **PubMed**, **Ovid MEDLINE**, **PsycINFO**, and more.
Clinical Information Resources	We don't have UpToDate but we offer **DynaMed Plus** – designed for specific clinical applications and conditions, multiple evidence quality rankings, drug monographs, and more. • *Contains a mobile app.* **AccessMedicine** **ClinicalKey** **Stat!Ref**
Library Guides in Medicine	Course guides and general guides in medicine.

Scholarly Publishing

Open Access Publishing	Available funding for APCs (Article Processing Charges) via Drexel Libraries' agreements with publishers, including discounts with select publishers.
Drexel Research Discovery	A Research Information Management System whose purpose is to help Drexel showcase its research and measure its influence by capturing, managing, and disseminating research outputs and data. It seamlessly integrates data with existing library and research workflows.
