## Over 40 Years of Success in Helping Students Achieve Their Career Goals in the Health Professions

Since our first program launched in 1981, we helped numerous talented students develop strong, well-rounded academic portfolios and become competitive candidates for health professional schools. We offer five different MS programs, and an evening certificate program, each designed for individuals with different backgrounds and varied career goals in the health professions.

**Drexel Pathway to Medical School (DPMS)** is an intensive one-year early assurance MS program with courses equivalent to the first year of medical school. DPMS provides opportunities to individuals who have been personally impacted by healthcare disparities, socioeconomic or educational barriers. Students who meet specific benchmarks matriculate into Drexel's medical school. Standardized test prep is offered if needed.

**Intensive Medical Sciences (IMS)** is a structured nine-month accelerated MS program with courses equivalent to the first year of medical school. Upon acceptance into IMS, students receive a conditional acceptance to the Drexel MD program upon meeting specific program benchmarks.

**Biomedical Studies (MBS)** is a unique, two-year MS program that blends undergraduate and graduate (including medical school equivalent) coursework and dedicated MCAT preparation. MBS offers students the opportunity to enhance their credentials and become competitive applicants for medical schools.

**Medical Science (MMS)** is a rigorous, two-year MS program that integrates first-year medical school equivalent courses with a year-long research experience in either basic or clinical research. MMS helps talented students develop the strong, well-rounded academic portfolios needed for competitive candidates for medical school.

**Interdisciplinary Health Sciences (IHS)** is a flexible, two-year MS program with multiple tracks that strengthen student applications to medical or allied health professional schools. The curriculum is tailored to student interests and incorporates a capstone project; standardized test prep is included.

**Evening Post-baccalaureate Premedical (PMED)** is a 17-month evening certificate program for working professionals considering a career in medicine or other health professions, offered on campus or as a hybrid. The curriculum includes undergraduate premedical prerequisites and standardized test prep.

## Our students benefit from:

- Faculty and staff with extensive experience in medical school admissions
- Courses taught by College of Medicine faculty
- Access to standardized test preparation courses
- Comprehensive and personalized application support
