Neuroscience High School Summer Camp Schedule
10:00am to 4:00pm

WEEK ONE

Mon 7/10  Introduction to the Brain and Central Nervous System and Spinal Cord Injury
9:30-10:00 Orientation: Camp program and BB LEARN explained.
10:00-12:00 Jed Shumsky, course director of Medical Neuroscience, will provide an overview of the
neuroanatomy of the brain and central nervous system.
1:00-4:00 Dr. Jed Shumsky and Adam Hall will describe the structure and function of the spinal cord,
detailing various sensory and motor pathways and the consequences of spinal cord injury.
Students will work in groups as amateur neurologists to solve clinical cases involving various
brain and spinal cord pathologies.

Tue 7/11  Gross Anatomy Experience in the Health Sciences Building
9:30 Shuttle Bus departs from Queen Lane
10:00-12:00 Students will work in groups in the Gross Anatomy Lab to identify structures on an actual human
brain with guidance from Drs. Shumsky, Peterson, Frank, Veazey, Bezdudnaya, and Howe.
1:00-4:00 Students will work in groups in the Gross Anatomy Lab to identify spinal cord and spinal nerves
and other anatomical structures with guidance from Drs. Shumsky, Peterson, Frank, Veazey,
Bezdudnaya, and Howe. Theresa Conners will be available to show human cadavers.
4:00 Shuttle bus departs from Health Sciences Building

Wed 7/12  Cellular Neuroscience
10:00-12:00 Dr Qiang will discuss advances in stem cell biology and how neurons differentiate, sprout axons,
and form synapses on the cellular level.
1:00-4:00 Kendra Case, Xiaohaun Sun, and Grace Giddings will demonstrate methods used in cellular
neuroscience research and other research techniques.

Thu 7/13  Nerve Conduction and Systems Neuroscience
10:00-12:00 Dr. Jed Shumsky will give a lecture on how nerve conduction works. Graduate student Arron
Hall will discuss systems neuroscience and provide some demos.
1:00-4:00 The afternoon will include a presentation from Drexel Admissions on how to apply to college.
Trevor Smith, Adam Hall, and Sophie Cohen will demonstrate animal survival surgery,
voltammetry, and other research techniques.

Fri 7/14  Sensory systems
10:00-12:00 Dr. Francis Sessler, course director of Human Structure and Function, will describe the human
sensory systems, comparing and contrasting the various receptors, transduction mechanisms, and
pathways leading to sensory perception.
1:00-4:00 Dr Shumsky and graduate students will introduce the research projects for the coming week.
Then students will explore visual illusions and sensory discrimination capabilities led by Arron
Hall.

WEEK TWO
# Neuroscience High School Summer Camp Schedule

**10:00am to 4:00pm**

<table>
<thead>
<tr>
<th>Date</th>
<th>Topic</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mon 7/17</td>
<td><strong>Neuropharmacology</strong></td>
<td>Dr. Jed Shumsky will describe neurotransmitter receptor systems and explain how these have been used to design pharmacologic treatments for psychiatric disorders.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1:00-4:00 Research groups will work on their research projects under the graduate student supervision.</td>
</tr>
<tr>
<td>Tue 7/18</td>
<td><strong>Animal Care and Use</strong></td>
<td>Dr. Rick Huneke, Director of University Laboratory Animal Research, will speak about the ethics of animal research and lead a tour of the Animal Facility.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1:00-4:00 <strong>Grad Student Panel:</strong> All of the available graduate student helpers will chat with the group about their journeys to choose to pursue neuroscience. Research projects will continue.</td>
</tr>
<tr>
<td>Wed 7/19</td>
<td><strong>Research Projects</strong></td>
<td>Research projects will continue.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1:00-4:00 Dr. Shumsky will give an overview of how to design presentations to best convey the information we have. Groups will begin planning their presentations to provide an overview of what they have learned on that topic, and a future experiment that they think would be an interesting ‘next step’ to explore. Research groups will meet with Graduate students to finalize research projects as needed and to plan presentations.</td>
</tr>
<tr>
<td>Thu 7/20</td>
<td><strong>Comparative Neuroanatomy</strong></td>
<td>Dr. Haviva Goldman, course director for Microanatomy and Human Structure and Function, will discuss the evolutionary origins of the skull and the brain. Graduate student Trevor Smith will discuss how the nervous system has evolved to adapt to challenges for different organisms.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1:00-5:00 Field trip for a “behind the scenes” tour of the Academy of Natural Sciences and to the Franklin Institute to see the Brain Exhibit and other exhibits of interest.</td>
</tr>
<tr>
<td>Fri 7/21</td>
<td><strong>Brain Machine Interfacing</strong></td>
<td>Dr. Simon Giszter, researcher in the neurorobotics and motor systems, will describe recent advances in the field of how the brain can control machines such as prosthetics for rehabilitation.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1:00-2:00 Students will finalize research projects and practice the group presentations.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2:00-3:00 Students will present the results of their projects to the graduate students and faculty</td>
</tr>
<tr>
<td></td>
<td></td>
<td>3:00-4:00 Camp wrap up and awarding of certificates of completion.</td>
</tr>
