Goals:

- To improve the history taking skills and physical exam skills prior to starting Radiation Oncology Clinic or as close as possible to starting program depending on simulation schedule.
- To improve skills in ENT exams, prostate, gyn/pelvic exams and breast exams.
- Skills to be taught and assessed specific to ENT include nasopharyngoscopy and mirror exams.

Objectives:

- To learn from the weakness assessed in the simulation program and work on these special skills with radiation oncology attending 1:1.
- Improve basic skills before starting to see patients with special oncology needs.
- Become more competent in performing ENT, pelvic and breast exams.

Sessions:

- One session for all new residents will typically occur June or July of PGY-2. One afternoon session occurs with Dr Kathy Ryan (Director of the simulation center).

Resident Responsibilities:

- Come to the center on time.
- Work closely with Dr Ryan.
- Ask appropriate questions.
- Fill out experience survey and make recommendations for improvement if necessary.
- Repeat sessions are available after the evaluation by simulation center Director.
