

A TYPICAL WEEK AS A DREXEL MED STUDENT

Foundations of Basic Science

Independent Learning (IL) Modules guide students through basic or clinical science content

Team-Based Learning (TBL) Labs and other interactive sessions help students integrate and apply information

Case Based Learning

Clinical Case of the week will help bring out learning issues of the week and teach clinical reasoning skills

Health Advocacy Practicum

Foundational orientation sessions at the beginning of the year

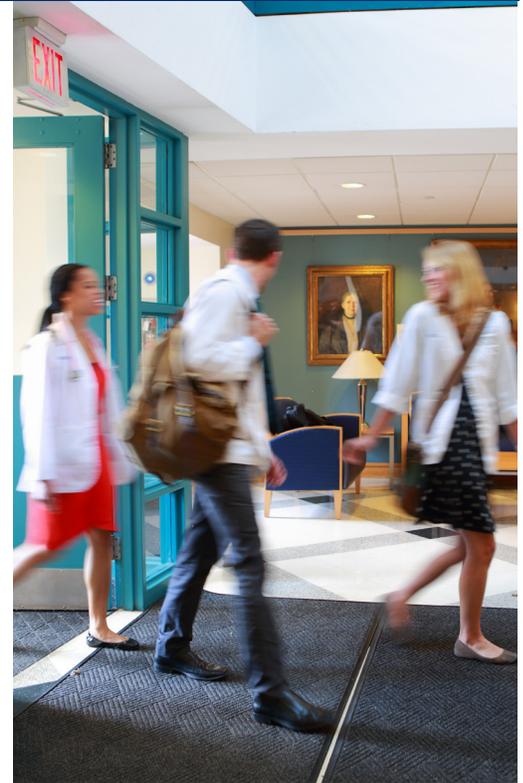

Offsite visits with health partners

One session per week

Foundations of Patient Care

Small-group, simulation and standardized patient sessions help students learn to talk to and examine patients

One topic per week
