

## IACUC Addition of Personnel Form

Requirements for adding personnel to an animal research protocol include enrollment and certification in the Occupational Health Program and fulfilling the necessary training requirements. Animal handlers must complete on-line CITI training and receive species specific training. They must also take the Animal Care Occupational Safety training and certification. Information about these programs is available on the [IACUC Training Requirements webpage](#).

Principal Investigator:

Name of Individual being added:

Protocol # (#s) to which person is added:

Species individual will be working with:

CITI On-line Training – List the completion date for each module:

Aseptic Surgery:

Investigators, Staff and Students:

Reducing Pain & Distress in Laboratory Mice and Rats:

Species:  Completion date:

ULAR - Date of Species Specific Training:

Occupational Health Certification Date:

Who will be supervising and training this individual in specific procedures?

Principal Investigator signature:

Date:
