

Drexel Executive Planning Committee Community Survey Findings – shared 4/30/20

Table of Contents

- Survey overview.
- Full survey results
- Initial draft of strategic priorities as identified by EPC
- Overlay of key survey responses with strategies identified
- Next steps

Survey analysis – overall

High level notes on survey outcomes

- Response rate of 16%, with 573 respondents answering at least 1 question
- Demographics for responses are evenly split between faculty (259 responses/45% of respondents) and staff(249 responses/ 43% of respondents analyzed) with smaller portion of respondents preferring not to answer (65 responses/ 11% of respondents)
- Differences between Faculty, Staff and Decline to Answer participants can contextualize key focus areas of each group, examples
 - Faculty and Staff differ most on future strategic priorities
 - Ex: Faculty focused on programming with Staff focused on tuition cost reduction
- Final question on survey answered by 50% of those responding to at least 1 other question, primary themes found (including % of those providing input)
 - Greater supports (financial and otherwise) to faculty and staff (28%)
 - Greater transparency in university matters including strategy (20%)
 - Clarity in mission and decision making aligned to mission (18%)
 - Focused improvements in student experience (16%)
 - Greater inclusion on decisions from ground level staff, faculty and students (15%)
 - Focus on improvements in University culture/morale (15%)
- Note: Survey responses collected prior to major impacts of COVID-19, answers do not reflect current response efforts

Faculty and staff response in relatively even numbers, with ~10% not identifying, responses breadth similar across questions and groups

Faculty	259	45%
Staff	249	43%
Declined	65	11%
No Answer	34	*

**Percentage allocated to respondents only*

Additional context for results

- Respondents listed on average ~2.5 focus areas for strengths, challenges and focus strategies (resulting in a total response rate of >100% for each question)
 - This was largely consistent across questions and groups
- For the 50% of respondents providing additional open feedback, there was an average of ~2 focus areas per response (also driving response rate >100%)
 - This was largely consistent across faculty and staff, with those choosing not to identify providing a slightly higher number of focus areas
- Results ordered by faculty response rate on comparison breakdown – this does not indicate priority but was done to provide consistency and ease interpretation

Breakdown of overall themes for strengths identified and context for designation

		Context/Description
Co-op/Experiential Learning	69%	Co-op, experiential learning, w/ most experiential learning mentions also mentioning Co-op
Location	30%	Philadelphia specific or being on an Urban campus, some mentions of proximity to other universities
General programming/Offerings	20%	Overall program quality excluding engineering and healthcare which have been split out - some specifics mentioned included Kline, Westphal and Lebow
Faculty	15%	Faculty more generally either as instructors or thought leaders
Research and research reputation	13%	Research, generally centered around R1 designation
Brand and reputation	12%	Included regional recognition, recognition as an institution based in career focused education
Programming diversity	9%	Range of programs and options for students, including instruction models (online/in-person/hybrid/etc.)
Civic Engagement	9%	Engagement, specifically in the local community, heavily skewed toward University City
Engineering program	9%	Specific mentions of Engineering program and impact on brand and reputation
Partnerships	8%	Range and depth of partnerships, both public and private, and the impact of these on co-op program
Health related programs	5%	Quality of college of nursing and medicine, and impacts to overall brand of healthcare programs
Flexibility/Adaptability	5%	Flexibility/adaptability of programming, interdisciplinary and cross-functionality of current offerings
Problem focused curriculum	5%	Curriculum focused on solving problems, driving solutions to complex issues
Demographic diversity	5%	Diversity of student body primarily, specific focus area of age diversity mentioned in several answers
None	4%	Specific indication that no strength exists
Drexel Staff	4%	Staff, usually mentioned in conjunction with faculty but with some independent mentions
Student quality/resilience	3%	High quality of students, answers indicate appreciation for student resilience, attitude and work ethic
Administration	3%	Administrative staff, mainly focused on high-level administration and their impact to overall brand
Global engagement	3%	Engagement with global issues, global partnerships and international opportunities
Quarter system	2%	Quarter system as a driver for student learning and engagement
Drexel Culture	2%	Culture and connection felt to Drexel, specific mentions include lack of pretension
Entrepreneurial Mindset and Focus	2%	Entrepreneurial mindset, specific references to programming driving this mindset in students
Online programs	2%	Online program quality and ability to reach broader range of students
Size of University/Classes	1%	Small school and class size differentiating Drexel from other universities, better supporting students

Breakdown of overall themes for challenges identified and context for designation

		Context/Description
Tuition Price/Costs to students	45%	Cost to students, high tuition cost, sticker price and the impact on student attraction
Organizational Structure and function	23%	Bureaucratic function of the university, lack of flexibility, difficult processes to manage, administration size and number of executive/leadership positions
Resources allocation	19%	Financial decisions and prioritization of financial resource placement, lack of clarity around how decisions are made and impacts on university function
Facilities quality	18%	Quality of physical facilities, tech infrastructure to support academics and administration
Mission and vision clarity	13%	Lack of clear mission, mis-alignments with resource allocation or developmental focus
University culture	11%	Culture within the university, impacts to morale of faculty and staff
Programming quality	11%	Overall quality of programs generally, impact to reputation
Faculty Support	10%	Support for faculty to teach and engage students, references to doing more with less
Funding Diversity and Stability	10%	Lack of diversification in funding sources, lack of endowment, funding instability
Student Services and Experience	9%	Services for students, especially to drive resilience, impact on graduation rates
Flexibility in programming and innovation	8%	Inflexible programs, lack of cross college connection, lack of flexibility in program models and lack of ability for students to engage across programs
Quarter system	7%	Pace of quarter system, misalignment with potential partners, impact on student morale
Research support	7%	Support for research, financial and administrative input w/ grant writing and facilitation
Faculty Salary	6%	Salary considerations of faculty, specifically adjunct faculty as well as PhD stipends
Diversity	6%	Demographic diversity of students, staff and faculty, not reflective of Philadelphia
Faculty quality	6%	Quality of faculty, focus on tenured faculty and lack of willingness to perform specific related tasks, as well as outdated pedagogy
Location	5%	Safety of university city, some mentions of proximity to other university options
Programming Breadth	5%	Breadth of programs, sense that Drexel is trying to be "everything to everyone"
Hospital and health program issues	4%	Impacts of hospital closure on reputation, mentions of quality of healthcare programming
Communications and transparency	4%	Communications, transparency of EPC process, financial and mission decisions broadly
Social sciences, Liberal arts, Humanities	3%	Primary responses indicate lack of enthusiasm for humanities programming, feeling it makes focus too disperse, some mentions indicate need for more focus however
Faculty Tenure prospects	3%	Structure for building faculty tenure numbers, issues with heavy focus on adjunct faculty
Students quality	2%	Quality of students admitted
Online program quality	2%	Quality of online programs, especially in how this compares to in-person programs
Community Engagement focus	2%	Increased focus on local community at the expense of more broad impact focus
None	2%	Specific reference to no challenges
Acceptance rate	1%	High acceptance rate and the impact on reputation and ranking

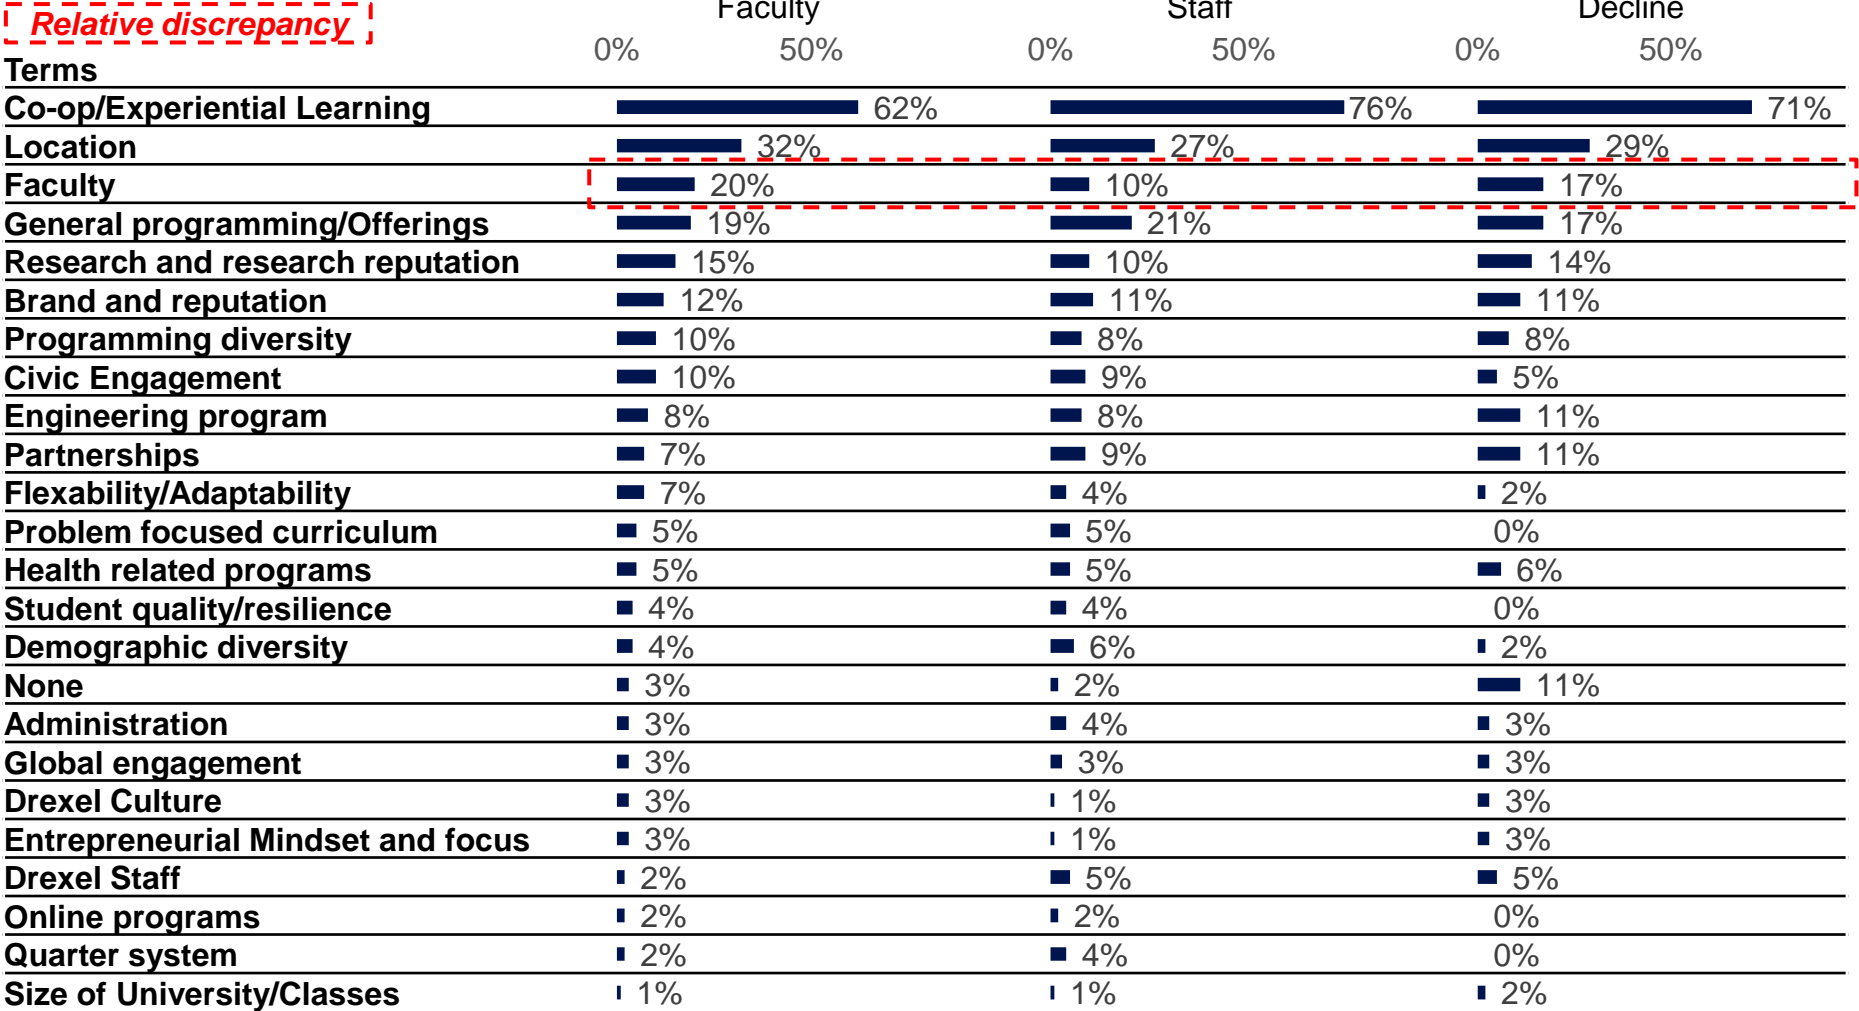

Note: Total responses 573, total >100% given multiple answers provided by participants

Breakdown of strategic themes identified and context for designation

		Context/Description
Streamlining Organizational Processes	20%	Streamline processes within administration to drive innovation in programming, more effective communication, greater focus on programming over expansion
Tuition cost reduction	18%	Reduction overall costs of education and sticker price to students
Financial Diversification	16%	Focus on diversifying funding sources, shoring up financial position
Student experience	15%	Improving student experience to drive reputation, increase retention and graduation
Research funding	15%	Allocating resources, ensuring maintenance of R1 status, building research reputation
General programming and education support	14%	Driving support to current programs to improve quality, update programs to modernize
Facilities improvement	13%	Improving both physical spaces and technology infrastructure, campus appearance
Programming innovation	13%	Innovation of new program models including cross-disciplinary programming, and new delivery models (online and hybrid online/in-person)
Faculty and staff retention/support	11%	Focus on faculty and staff supports and retention to maintain highest quality employees
Interdisciplinary/admin flexibility	10%	Building bridges across programs, admin flexibility to support programs, drive innovation
Increased diversity	9%	Increase diversity of students, faculty and staff, especially in leadership positions
Student recruiting	9%	Broadening recruiting strategy especially given shift in coming years
Right sizing university offerings	9%	Decreasing university offerings to focus resources on smaller set of programs
Reputation enhancement	9%	Marketing of current strengths, drive improved reputation and increase ranking
Problem solving and innovation	8%	Developing programs focused on solving major local and/or global issues
Co-op expansion	8%	Expanding co-op across all programs, making the co-op experience more uniform
Communications and transparency	8%	Increasing transparency of communications both within and outside university
Mission and vision clarity	7%	Building clear mission and vision, plan with goals and tactics tied to that mission
Partnership expansion	6%	Expanding partnerships both public and private, locally and globally
Faculty improvement	6%	Improvements in faculty quality, specific mentions of retaining faculty willing to engage more as instructors and recruiting faculty more well-known in their fields
Civic engagement	6%	Increasing engagement in the community, largely the local community, but also the national and global expansion community
Cultural improvement	6%	Driving cultural connection to the university, alumni, improving students and staff morale
Graduate school enhancement	5%	Increasing number of options for grad school, enhancing graduate student programming
International engagement	4%	Specific mentions of increasing international engagement and focus in programming
Hospital and health programming	3%	Increasing healthcare focus, enhancing marketing and reputation given hospital closure
Humanities prioritization	2%	Increasing focus on humanities to drive more well-rounded student body, improve school rankings and comparison to other universities
Establishing semester system	2%	Departing from quarters to drive student morale, fit more easily with potential partners
Engineering program enhancement	1%	Focused engineering program enhancements, including infrastructure and pedagogy

Note: Total responses 573, total >100% given multiple answers provided by participants

Strengths broken down by faculty and staff – primary divergence in relative ranking of faculty as primary university strength

Note: Total responses 573, total >100% given multiple answers provided by participants

Challenges broken down by faculty and staff – divergences exist in views of structure, resource allocation, facilities and student experience

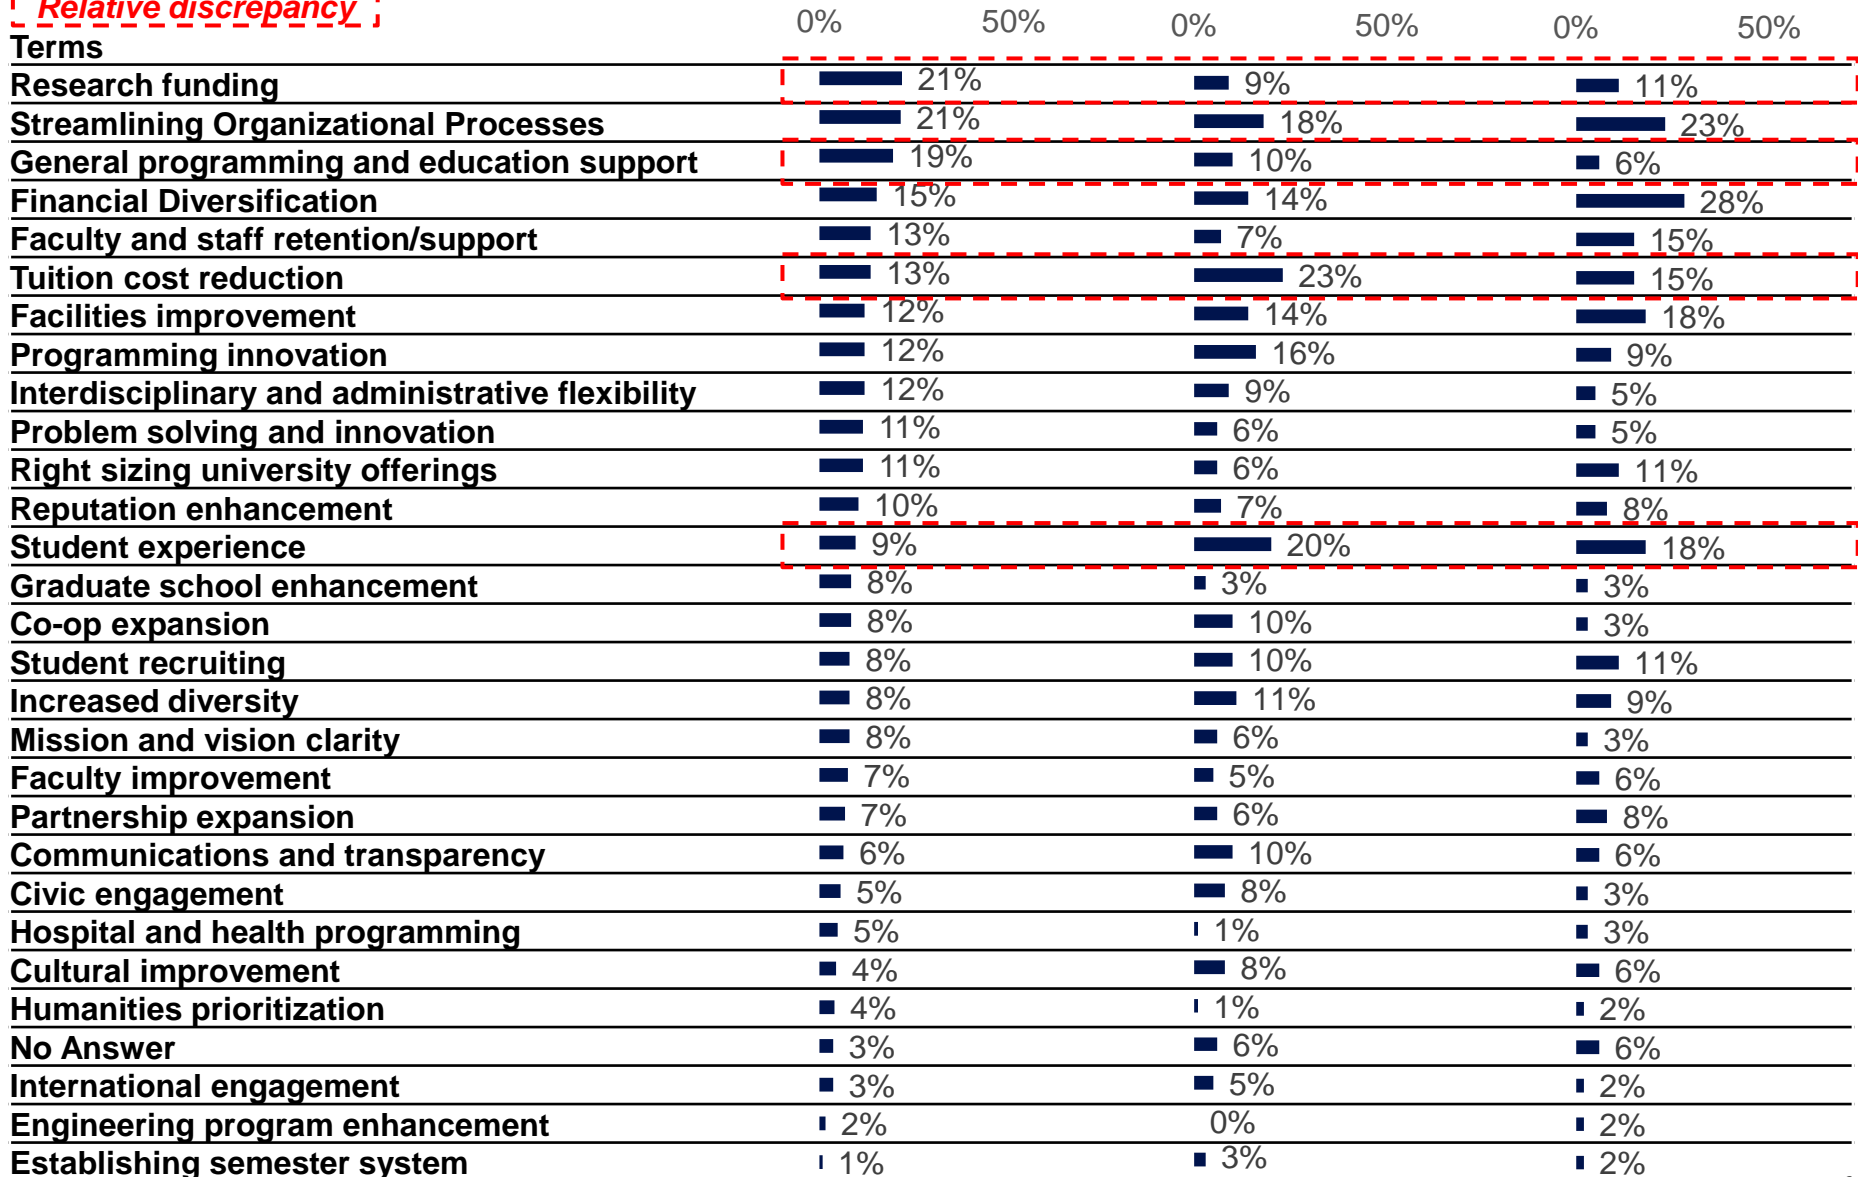

Relative discrepancy

Note: Total responses 573, total >100% given multiple answers provided by participants

Strategies broken down by faculty and staff – show divergences in research funding, programming, tuition costs and student experience

Relative discrepancy

Note: Total responses 573, total >100% given multiple answers provided by participants

Qualitative quotes illustrating most prevalent strengths identified in survey responses

Strengths	Faculty	Staff	Decline to Answer	Illustrative quote
Co-op/Experiential Learning	 62%	 76%	 71%	"I don't know of another higher ed institution that is able to integrate the opportunity for paid work/internships into regular curriculum"
Location	 32%	 27%	 29%	"The Philadelphia community as a whole, sports, entertainment, dining etc"
Faculty	 20%	 10%	 17%	"The warmth and commitment of faculty to students."
General programming/ Offerings	 19%	 21%	 17%	"Strong connection of the curriculum to industry and the needs of the region."
Research and research reputation	 15%	 10%	 14%	"Increased focus on research, especially with the recent R1 designation."
Brand and reputation	 12%	 11%	 11%	"Legacy of producing top notch graduates in their fields of study."
Programming diversity	 10%	 8%	 8%	"Breadth of offerings - health sciences, technology/IT, design/media, engineering"
Civic Engagement	 10%	 9%	 5%	"The Drexel commitment to the local community - civic engagement initiatives."

Note: Total responses 573, total >100% given multiple answers provided by participants

Qualitative quotes illustrating most prevalent challenges identified in survey responses

Terms				Illustrative quote
Tuition Price/Costs	37%	50%	49%	"The cost of tuition is the single biggest competitive weakness."
Org processes	25%	17%	34%	"Fragmented processes make it difficult to efficiently and effectively assist students"
Resources allocation	23%	12%	25%	"We...under-invest in the real educational mission (of Drexel)"
Mission/Vision clarity	15%	10%	14%	"We lack a sense of community and shared identity"
Facilities quality	14%	20%	22%	"...it is shocking how little budget is available for supporting core facilities..."
Programming quality	14%	8%	6%	"Degree programs that do not address the...landscape of workforce development"
Faculty Support	13%	9%	6%	"...better system needed to acknowledge staff going above and beyond..."
Funding Diversity	13%	7%	11%	"...constant budget problems and constant crisis mode operations..."
Research support	10%	4%	3%	"Lack of promotion and support of research and our R1 status"
University culture	10%	13%	11%	"Internal culture and Focus on the past and the way things have always been done."
Student Experience	6%	12%	9%	"Poor central student services, students feel like their getting nickel and dimed"

Note: Total responses 573, total >100% given multiple answers provided by participants

Qualitative quotes illustrating most prevalent strategies identified in survey responses

Terms

Strategies overlap

Research funding	21%	9%	11%	“Prioritize re-investment in research and bringing new technologies to the market”
Streamline processes	21%	18%	23%	“Organize processes to be more streamlined and/or more transparent.”
Program support	19%	10%	6%	“Identify the strongest programs and strengthen them further”
Financial Diversification	15%	14%	28%	“Be less fiscally dependent on tuition”
Tuition cost reduction	13%	23%	15%	“Lowering the cost of tuition while retaining faculty and keeping class size manageable”
Faculty/staff support	13%	7%	15%	“Focus on providing staff with professional growth and advancement opportunities”.
Facilities improvement	12%	14%	18%	“Improving classroom technology should be a top priority.”
Programming innovation	12%	16%	9%	“Develop novel programs, including masters programs for executives in the area.”
Flexibility	12%	9%	5%	“More avenues for interdisciplinary education and initiatives”
Student experience	9%	20%	18%	“More focus on the Student Experience in and outside of the classroom”

Note: Total responses 573, total >100% given multiple answers provided by participants

Key strategic goals – mission and vision document

Strategic goals

- Grow basic and applied research that generates new knowledge and impactful solutions.
- Deliver agile curricula responsive to rapidly changing societal needs.
- Provide an array of engaging, immersive learning experiences that prepare students to lead purposeful and positive lives.
- Leverage Drexel's unique academic design to serve as a national model for reshaping the relationship of universities to external partners.
- Engage community partners to contribute responsible, sustainable solutions that improve the quality of life in the region and beyond.
