

A CLIMATE CASE COMPETITION
 DREXEL CLIMATE & SUSTAINABILITY
 SEPTEMBER 22-24, 2022

DATA4EJ

Can you make
 benzene
 measurements tell
 a story about
 justice?

WE NEED A NEW METRIC

*Metrics tell a big story in a single number. The Air Quality Index (AQI) tells a story about how you can protect yourself from pollution: an AQI over 150 says stay inside. It doesn't tell how people of color suffer more from poor air quality, or how to take collective action to dismantle environmental racism. **Data4EJ** is your chance to invent a metric that does.*

Open to all Drexel students

Undergraduate and graduate students are welcome to participate.

\$2,000 prize pool

Distributed among top 3 teams

Information/registration
