

# The Climate Change and Urban Health Research Center (CCUH)

CCUH is

**global**

initiative...

- Focused on **connecting evidence** with urban policies
- Utilizing cross-city and **cross-country analyses** to understand varying impacts
- **Strengthening capacities** of researchers to generate and promote actionable evidence for climate adaptation

## Research

to explore heterogeneities in intra-urban inequities

## Capacity building

to support the next generation of climate change and health researchers

## Policy engagement

To inform research questions and support evidence-based policies
